Plagiarism, of course, is very bad. If you have to show this to other people, then please credit me. - I worked on this guide not only with effort, but with my free time. Please give your thanks by adding a reputation. What to expect from this guide: The Basics of Eve's Skills, and which to get to your preferences Useful tips This guide will not only focus on how to use Eva well, but will help you become experienced with the code Exoticand eventually code Nemesis. Sections:1: Eva: Other code - 1.1 Information - 1.2 Basic attacks and sequences - 1.3 Skills of another code2: The day before: Code Exotic - 2.1 Information - 2.2 Extra Basic Attacks and Sequences - 2.3 Code Exotic Skills 3: Eva: Code Nemesis - 3.1 Info - 3.2 Additional Basic Attacks and Sequences - 3.3 Code Nemesis' Skills4: Extra - 4.1 Tips and Special Tricks - 4.2 Combo Videos - 4.3 Skills Build Help - 4.4 Equipment Recommendations1: Eva: Another Code1.1 Who Eva? In the land of Elnos, there was a kingdom that succeeded in all areas of technology, called Nasod. They were a powerful nation and did not pose any threat to people. However, as El Stone's power gradually waned, the Nasod nation soon lost power and others became corrupt. To prevent this catastrophe, Eva, the queen of Nasod, went to save your life. Years passed, and Eva woke up as soon as el Stone's fragments entered her preservation, sending her away from deep sleep. Unfortunately, the survivors of The Oddol all turned out to be corrupt, others destroyed Elsword, with people trying to Back. However, Eve has not given up hope of reviving her kingdom. In order to regain her strength, she decided that the best choice was to get on the road with Elsword and his gang. After years of sleep, the first time a boy said they wanted to be her friend really touched her heart. Eva may not look tough like the others, but she uses her forces of technique to take down enemy forces for her. Since Eva is the queen of Nasod, she can summon robots from her kingdom to help her in her battle whenever she wishes. Eva also uses Nasod Gears, which can turn into all sorts of weapons to defend themselves in combat, ranging from copies to explosives.1.2 Major attacks and sequences you must first know that Kew and X are the main keys for each character. For Eva, it's a sequence for bashing her Nasod gear. Using X will have Eve to cause electronballs, slow but powerful electricity blasts. 1.3 Skills of another codeWhat is skills? Skills are attacks that improve your character's game. For Eva, she uses a lot of skills related to calling Nasod robots on her command, and in the future, commanding two strong and very loyal robots that remain on Eva's side. Note that there are different types of skills: active, special active, passive and buff skills. Active - Skills that occur immediately if not cancelled by the hit. Active skills are added to fast slots. Special Active - Skills that are just like assets, but the Elsword game adds an extreme epic to these types of skills. The character performs a special skill that will soon freeze the area. During this, the cut in the art of the character slides while he/she shouts skill names. The skills are then performed. It's a lot of fun. Passive - Skills that modernize character, constantly. Passive skills are never added to fast slots. Buffs are skills that modernize a character, such as physical attack, magic attack and defense. They are like liabilities, however, they are not permanent because they are used in fast slots. Because they are used in fast slots, they provide more power efficiency, however they cost mp and term. Now, please remember the following terms: PvE - Stands for Player Vs. Environment, Environment Meaning Monsters in Dungeon Areas. The term is used mainly if you are in a dungeon a lot. If you like to do a lot of dungeons rather than PvP, then you build PvE. PvP - Performs for Player vs. Player. The term is obvious, but in case the server uses it you prefer to fight other players more often than dungeons. Hybrid - This term is a combination of PvE and PvP.It will indicate the amount of SP that needs to be invested to access the next series. I'll be consistent that every skill is where it is in a row. As for skill recommendations, I'll be on how many points you should invest in skills by dividing into builds. It's RECOMMENDED, not necessarily (well, except for a few). However, there will be times, times. You have the choice to choose which skills to put points, because of the SP investment limit. If you are having trouble remembering your way of investment craftsmanship, don't be afraid. There is a skills simulator for all the characters. Click on the following link to head to CE Eva and CN Tree Skills. Skills Simulator CE / CNAl right, let's get started! (0) Line 1: Basic Magical Defense Training - Increases Magical Defense. This is one of the roles to make craftsmanship build trees to never miss your liabilities if necessary. Follow this rule if I don't say not to. Here, follow the rule. PvE - 5/5 PvP - 5/5 Hybrid - 5/5 Illusion Strike - Call 8 Gears to strike simultaneously. A decent starting skill. But leave it on Lv1. PvE - 1/5 PvP - 1/5 Hybrid - 1/5 Masking - Turn invisible for a certain period of time. This skill is great depending on how you use it. It has very little use in dungeons what it is, so there is no point in having it with you while the dungeon works. In PvP, however, this skill will allow you to sneak up to enemies on the players. While against experienced players, it is possible that they can see you through check outlines, shadow, weapons glowing, etc. Another application for this skill is that, as Eva throws the disguise, you will be under super armor status for a while, allowing you to confront back if the enemy gets close to you. Skill Note: Waiting alone - gives 10 MP per second regeneration while in Cloaking, but increases coolness to 10 seconds. - Received from a rare drop of a monster. A few useful note, but not really worth it unless you are an experienced Cloaking user. This only proves its value in PvP. PvE - 1/2 PvP - 1/2 Hybrid - 1/2 (5) Line 2: Basic Physical Protection Training - Increased Physical Protection. Follow the rule: don't miss this passive. It may not seem like much, but these little moments actually do a lot. PvE - 5/5 PvP - 5/5 Hybrid - 5/5 Measuring Link - Call Nasod Scout on your side. One of Eve's fun skills on call. You call Nasod monster scout and he will attack enemies in his sight, even stun them. In dungeons, it has very little use. However, in PvP, it's good to have. Basically, while you're in a combo, Nasod Scout will be with you (if you're aroused before you combo). He will either stun the enemy with his attacks, or get combated with you, and when he is destroyed, he explodes and stops your opponent! The Nasod Scout on Lv5 will deal with some small bits of damage that will help in the long run, and will last longer so that they can intercept an enemy from afar or explode if they hit the combo too. You don't have to have it, it's not recommended, if don't know how to use this skill well. Skill Note: Continuous Called Attack - Nasod Scout no longer knocks down when aroused and its attacks will have a smaller knockdown rate, cool down increases by 5 seconds. - Received from Toma in Bethma. Experienced PvP players who use Dimension Link like this note. You can add it between combos, so that as you continue Your Nasod Scout will add its own damage and doesn't affect your knockdown speed very much. Don't worry about increasing cooling, you shouldn't call scout too much. PvE - 0/5 PvP - 0/5 or 5/5 Hybrid - 0/5 or 5/5 (10) Line 3: Basic Magical Preparation - Increase Magical Attack. Premise: Basic Magic Defense Training What is the rule again? That's right! Don't miss this passive. PvE - 5/5 PvP - 5/5 Hybrid - 5/5 Illusionist Stinger - Transforming gear into a powerful spear, leaving a trail of electronic pulses. Very powerful skill. This is one of Eva's best skills for her low level. This is very effective on big enemies, which includes most mini-bosses and some bosses, because of all the hits hitting them. It's also great for mobs. However, it's bad against small, human-sized enemies like Raven's 4-1 or Chloe's 5-2, so it doesn't depend on it too often. A must have at all costs. Skill Note: Modified Chaos Engine - Reduces MP consumption by 20 and reduces blast range by 20%. - Received from a rare drop of a monster. This will allow you to use Illusion Stinger in an earlier time, plus, it will reduce your anxiety for smaller opponents, since you will be able to deal with more hits. PvE - 5/5 PvP - 5/5 Hybrid - 5/5 (15) Line 4: Aura Magic Accelerator - Increase the magical attack of the Allies in range and yourself. The useful positive effect that I recommend is that you should try to max. Mainly, code Exotic / Nemesis main arsenal of attacks is magical damage, so it is a useful positive effect, also, as the Code is Exotic, you get passive, which increases the length of the buffs, and like the Nemesis code, you get passive, which will increase the critical chance of speed and damage. PvE - 0/5 and 5/5 PvP - 0/5 - 5/5 Hybrid - 0/5 - 5/5 Base Strength Training - Increased Physical Attack Damage. Premise: Basic physical training defense rule. ... You know. PvE - 5/5 PvP - 5/5 Hybrid - 5/5 Measuring Link Blader - Call Nasod Blader to cut enemies several times and then fire the beam. Premise - Mastered Dimension Link is another call skill. Nasod Blader (think 2nd boss of the cargo airship) comes in and makes a slash comb, and finishes with a laser. Cool but mediocre damage. It is not recommended to take at all if you just want to have fun with it. PvE - 0/5 PvP - 0/5 Hybrid - 0/5 (20) Line 5: Aura Shield Accelerator - Increase the protection of allies in range and yourself. Not quite to be a positive effect. Defense momentum huh. If you can't fund yourself with very good armor to further increase your reduced damage, you have the option of missing out on this positive effect. PvE - 0/5 - 5/5 PvP - 0/5 - 5/5 Hybrid - 0/5 - 5/5 (25) Line 6: Aura Energy Accelerator - Increase physical attack strength of allies in range and itself. Buff you consider adoption. However, you won't use physical attacks often as much as magical attacks, so if you like partying or doing PvP teams with physical players (like Lord Knight, Wind Sneaker, etc.), you have the opportunity to take that. PvE - 0/5 and 5/5 PvP - 0/5 and 5/5 Hybrid - 5/5 Camouflage Study - Increase the amount of cloaking time activated. More time to be invisible nice. At max Lv3, it's just an increase of 1.5 seconds, with a total of your invisibility time up to 4.5 seconds. Useful for experienced cloaking users. Don't worry if you're not going to play on PvE often or use it well. PvE - 0/3 PvP - 0/3 or 3/3 Hybrid - 0/3 or 3/3 (30) Line 7: Create a Blackhole - Create a black hole to pull enemies and then cause it to blow up the case of extreme magical damage. I like this skill because it's like Rena's Wind Wall, except that it's shorter in duration, but much more absorbing the effect. It sucks up almost anything it can catch in range. PvP users can have teammates deal with quick damage as the black hole is open, or you can catch running players if you use it at the right time. As they say, you collect mobs. Not only will enemies stuck in a black hole be repeatedly damaged before the explosion, but if you can make all the hits, it will do more than the usual version. Aside from the damage, you can do some fun glitches with this skill. I highly recommend this skill for beginners, it's simple and does some great damage for their one or more hits. Skills Note: Black Hole Ver. 4.0 - Increases the black hole suction range by 30% and increases damage by 10%. - Received from a rare drop of a monster. This note about the skill further increases the power and potential of Gbh. I absolutely love this skill and took a skill note, and found the suction increase range to be very significant. The extra damage is very nice too. Recommended take if you don't have any other skill notes to use. PvE - 0/5 or 5/5 PvP - 0/5 or 5/5 Hybrid - 0/5 or 5/5 Dimension Link Guardian - Summon Guardian to shoot waves in both directions, dealing continuous hits of magical damage. Powerful, fast harmful skill. It will hit a somewhat long distance in both directions. Just like Stinger's Illusion, it's mediocre on petty enemies, but it can clear mobs, and it's especially cool with auto bosses. It will have its best use in dungeons, don't worry using it in PvP. This can be easily avoided with platforms. PvE - 0/5 or 5/5 PvP - 0/5 or 5/5 (35) Line 8: Mana - Conversion of some HP into MP. A useful skill, especially for Code Exotic/Nemesis. At times you may be in need of a quick MP for a certain skill you will have to use. Be careful though, it will deplete HP quickly if you use it too much. Recommended take if you have spare skill points. Skill Note: Bogus Contract - 30% chance of not taking HP with skills, but increases cooling to 8 seconds. - Received from Camilla, PvP NPC. Adds a chance not to take up your HP, which is really good. If you like to use this skill, feel free to take note. PvE - 0/3 or 3/3 PvP - 0/3 or 3/3 Hybrid - 0/3 or 3/3-And these are all beginners of Eva's work skills. When you reach level 15, you can start promotion to the quest.1. Clear 2-4 twice at any difficulty. 2. Collect 1 drop from Kira-Kira (Mini Boss) at 2-1 in very hard mode. 3. Clear 2-2 on hard mode or above (I) at least B rank. 4. Talk to Echo, the alchemist of Elder.And after that, you have two quests to choose from: Code Exotic and Code Architecte. Obviously you had to choose Code Exotic.1. Collect 4 drops from Wally No.6 bats at 2-2 at any difficulty.2. Collect 1 drop from Wally No.6 Boss) at 2-3 at any difficulty.3. Collect 1 drop from Little Soldiers in 2-3 at any difficulty. Collect 20 metal shards from the dismantling of the weapon.4. Clear 2-5 in a very hard mode, or in 3x-6 mode in very hard mode. 5. Collect 1 Unstable Soul from Proxy Forester (Mini Boss) in Faith Dungeons. (Located in 3x-4 in hard mode or above, recommended 3x-4) c. Collect 1 Strong Soul from Factory Lords (Boss) in 3x-4 at any difficulty. 4. Talk to Hannah, the blacksmith welder.5. Collect 3 Exquisite Dark Steel from Uno Hound (Boss) at 5-1 on any difficulty. -After the end of a long search, now you have become the Code Nemesis, Goddess of Justice!3. Code Nemesis3.1 Goddess of Justice: Code NemesisBecoming Faster, Stronger, Battle Code Exotic began to develop. Eva fought many infected People and devils, but sought more power. The code needs to be changed to make it more efficient more ancient weapons Nasod. Calling a large arsenal of enchanted weapons, the Goddess of Justice will overwhelm all their opponents!3.2 Extra basic attackHes you get promotion, you will also get an additional attack that will improve the game as well as expand the variety of combos. Note that these sequences are, of course, the Code Nemesis exclusive. XX - Throw out two electronballs and then stun the victim with a spear, and then continue to summon extra Nasod Spears to punch the enemy, ending with his strong final blow, which knocks the enemy up.3.3 Code Nemesis' Skills As the great Nemesis code, now you get an increased arsenal of weapons. With new weapons in hand along with the expansion of the manipulation of already owned Nasod weapons, you become the goddess of justice to wreak merciless havoc on those who deserve their destruction. You'll also still see another skill that (LOCKED). So yes, prepare for this skill quest. (70) Line 15 Improved Nasod Weapon - Regular attacks have a 4% chance of inflicting additional magical damage. It doesn't look like much, I mean, you have a very low chance of inflicting extra magical damage. But hey, it's not exactly useless at all. 4% will come and go, but it will at least prove useful when you deal with so many hits with your attacks (especially the cycle). Just max, it'll cost later. PvE - 3/3 PvP - 3/3 Hybrid - 3/3 Atomic Blaster - Step back and pull the blaster, shooting the enemy up into the air. Simple and powerful 100 MP skill, recommend max. It easily replaces Hornet Sting if you have, because the atomic blaster will have more damage and you can combo enemies after. It will take care of any enemy in any situation. The goal is to carefully deal with a maximum of 12 hits for maximum damage. PvE - 5/5 PvP - 5/5 Hybrid - 5/5 (75) Line 16 Concentration Aura (LOCKED) - All aura boosters will now provide increased critical speed and damage to themselves and party members. Big passive, which makes Code Nemesis the best support role. At a maximum level of 5 you'll have a 7% increased critical chance and 5% additional critical damage. It doesn't look like much, but it really helps. This will last as long as the accelerator aura that you have used. Recommended if you can save skills slots for your Aura Accelerator (s). If you don't have a B-Slot by now, or if you can't save space for your boosters, then that's fine, you may miss this passive. Please note that the effect does not add up. Thus, using Aura Magic and Aura Power together will not give a 14% critical increase in odds or 10% critical damage increase, you only get 7% and 5%. PvE - 0/5 or 5/5 PvP - 0/5 or 5/5 Hybrid - 0/5 or 5/5 to unlock the concentration of aura, you have to do an Advanced Branch Skill quest, available on Lv40. - quest 1: Buy a high quality scroll (It's worth it ED by Camilla, a.k.a. PVP GIR) quest 2: Collect 50 drops from any crowd in 4-6Quest 3: Collect 4 drops from Uno Hound (Boss) in 5-4 at any difficulty. quest 4: Collect 3 drops from Chloe (Boss) at 5-2 on a very tough quest 5: Clearly 5-1 on an Difficult in less than 6 minutes, clear 5-2 on very hard in less than 8 minutes, and clear 5-3 on very difficult in less than 8 minutes. - Spear Blast - Drive the sting down to the ground, piercing any enemy on the way and create a shock wave that damages them. Can only be used in the air. Super armor is available for the duration of the skill. An active skill that leads Code Nemesis for combos purposes, and if you can't catch enemies afterwards, it has little use in dungeons. You could, however, use its super armor effect. PvP-wise, you can chain this with a gttgq attack, so you'll have to deal with some spear blast damage. PvP users to learn how to use this skill wisely, it will prove to be a big cost to either combo or get away situations. PvE - 0/5 or 5/5 PvP - 5/5 Hybrid - 0/5 or 5/5 (80) Line 17 Atomic Shield - Challenge Nasod nano-machines that generate aura around a symbol that reduces damage, allies inflicted and destroys projectiles. Another skill that provides the ability to support Code Nemesis. This will prevent a projectile type attack from hitting you if you are inside the shield, i.e. arrows, fireballs, electronballs, etc. in PvP special active skills such as Rail Stinger or Magic Missile will not be blocked. It's not bad at all. In a situation where you will expect to take a lot of damage, the shield will reduce the damage you take. Has some application for dungeons, for example, to help in case the boss gets tricky with you, and does great for the PvP team. optional max. PvE - 0/5 or 5/5 PvP - 0/5 or 5/5 Hybrid - 0/5 or 5/5 5/5 elsword eve code sariel guide. elsword eve code esencia guide. elsword eve code nemesis guide
